Bhopal, Madhya Pradesh - 462001, India

OBJECTIVE

Seeking a challenging position in Software Development to leverage my expertise in Mern And Mean. Aiming to contribute to innovative projects at the intersection of Frontend and Backend and practical problem-solving in fields such as JavaScript , Python.

EXPERIENCE

• Cylsys Software Solutions Pvt Ltd

Software Developer

Jul 2024 - Present

Mumbai, India

- Developed a comprehensive frontend design, achieving a user-friendly interface for WatchApp.
- Implemented various APIs, enhancing functionality with features like Map Server, Task Scheduler.
- Conducted analysis on user interaction data, identifying key improvements in user experience.

Software Developer Trainee

Apr 2024 - Jun 2024

- Engineered a dynamic product detail system and Developed an intuitive add-to-cart feature and allowing users to seamlessly add items to their cart and manage their orders.
- Implemented a robust cart management system,through features like item deletion and order processing.
- Conducted user feedback analysis via a post-order feedback form, validating user satisfaction and gathering insights for future enhancements.

• NxtWave

Full Stack Developer Trainee

Feb 2023 - Nov 2023

Remote

- Developed a responsive and dynamic To-Do application using JavaScript, allowing users to create, update, and delete tasks. Implemented local storage for data persistence and ensured cross-browser compatibility.
- Leveraged React to build interactive web applications, integrating APIs to fetch and display dynamic data. Focused on creating seamless user experiences with state management, component-based architecture, and efficient data handling.
- Created RESTful APIs using Node.js and Express.js to handle server-side logic and database interactions with SQL. Ensured robust security measures and optimized performance for scalable applications.
- Utilized HTML, CSS, and Bootstrap to design intuitive and responsive interfaces. Prioritized user-centric design principles to enhance accessibility and user engagement.
- Collaborated using Git for version control, ensuring smooth code integration and team collaboration.

EDUCATION

• Lakshmi Narain College Of Technology

MCA

- GPA: 8.9/10.00

Apr 2019 - Jun 2022

Bhopal, India

• Govt.Motilal Vigyan MahaVidyalaya

Barkatullah University

- Grade: 59.43%

April 2019

Bhopal, India

• Indira Priyadarshini Higher Secondary School

XII

- Grade: 63.43%

May 2016

Bhopal, India

PROJECTS

- **WatchApp**

May 2024 - Sep 2024

Tools: Postman , Git , VS Code and Angularjs , TypeScript , Html , CSS , Bootstrap

- Designed and developed an intuitive and user-friendly interface for the WatchApp, ensuring a seamless user experience
- Integrated various features such as Dashboard, Task Scheduler, Map Server, Alarms and Triggers etc.
- Connected the app through APIs for real-time data updates, ensuring the accuracy and relevance of displayed information.
- Established dynamic data binding between the UI and backend, allowing for real-time synchronization and updates across the app.

- **Shopping Site**

Jul 2024

Tools: Git , VS Code and Angularjs , JavaScript , Html , CSS , Bootstrap

- Developed a CRUD system for managing a shopping site, achieving seamless integration between the item list and cart functionality.
- Implemented a hover and click feature that allows users to view item details, processing a dynamic list of items.
- Created a detailed item page visualization for users to review product details before adding items to the cart.
- Developed a feedback form component that appears as a popup after an order is placed, ensuring easy integration with the overall system.

SKILLS

- **Programming Languages:** Python , JavaScript
- **Web Technologies:** AngularJS , Reactjs , Expressjs , Node.js , TypeScript
- **Database Systems:** MySQL,
- **Specialized Area:** Frontend , Backend , Full Stack
- **Other Tools & Technologies:** Html, CSS , Bootstrap
